

## How to add "Lib" printer on Windows 10

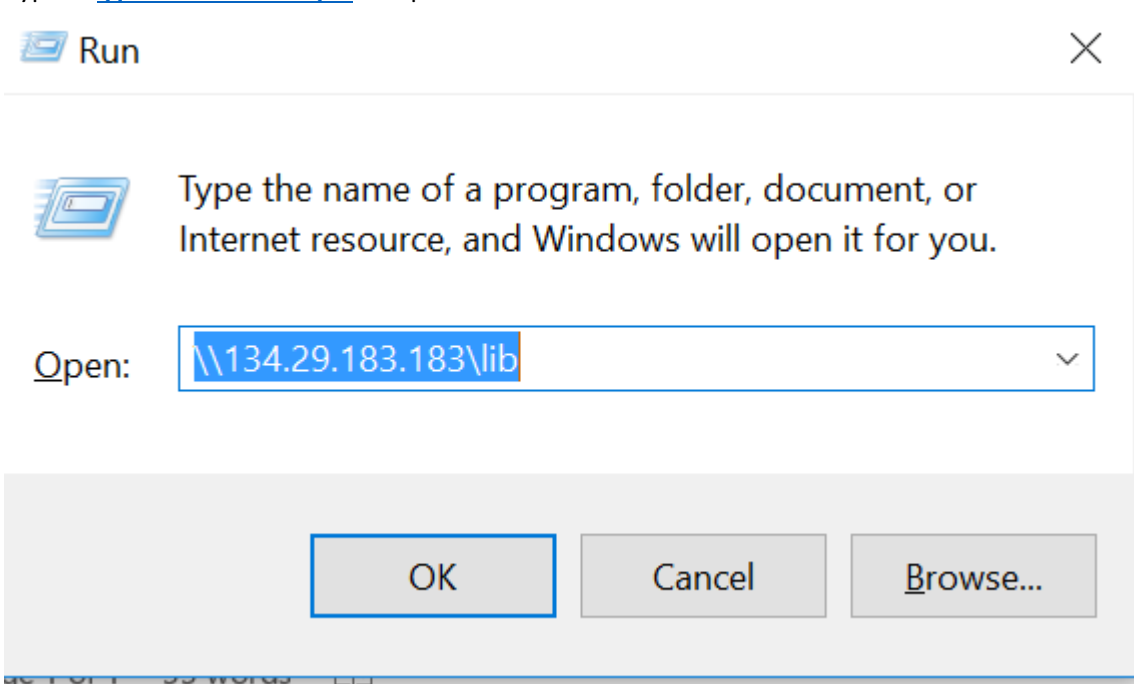

1. Connect to "lhcc" network located at the bottom right

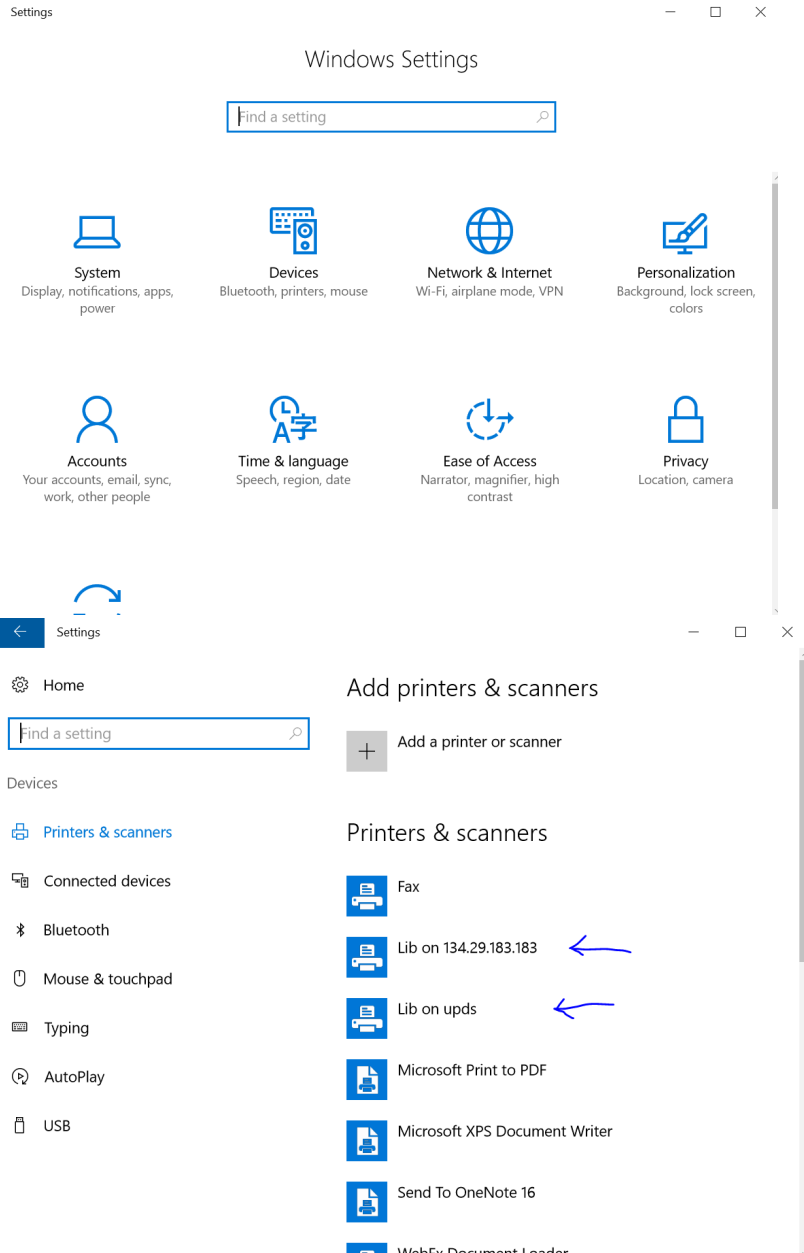

2. Press start located on the bottom left
3. Type **Run** and press **Enter** in the search box

4. Type in [\\134.29.183.183\lib](#) and press **Ok**

5. You should be prompted to **Authenticate/login**. Use **lhcc/(starID)** and **password** for prompt
6. You should now be able to see the printer under **Printers** located in **Settings**. This can be accessed by **Start > Settings > Devices**. You will be able to see the printer under **Printer and Devices**.

7. While printing, select **Lib on UPDS** or **Lib** or **Lib on 134.29.183.183** to print. If you are unable to map the printer, please **restart** your device and attempt to connect to "**Liblab1**" or "**Liblab**" by typing in <\\134.29.183.183\LibLab> or <\\134.29.183.183\Libalab1> instead.
