

Engineering at Inver Hills

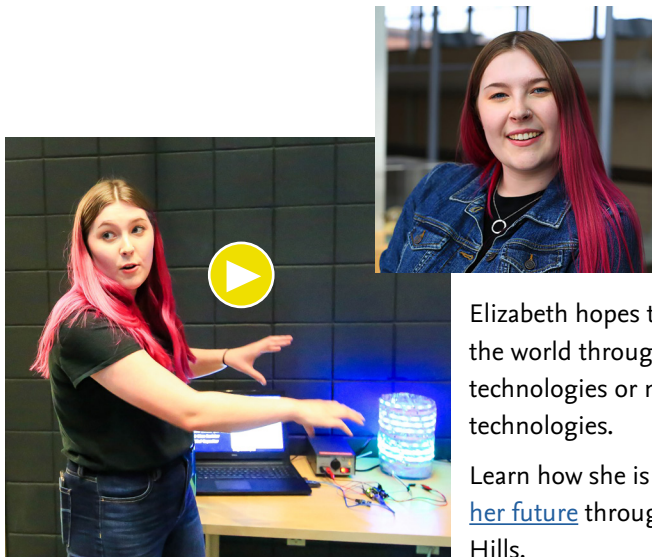

ENGINEERING

Engineering is creative problem-solving to improve the human condition. Using theories as well as scientific and mathematical applications, engineers imagine, design, create and improve the world around us. Engineers and the various engineering fields are essential components of virtually everything we take for granted in modern civilization.

FIVE KEY REASONS WHY INVER HILLS IS A SMART CHOICE FOR FUTURE ENGINEERS

1. Inver Hills is a proven pathway to a Bachelor of Science (B.S.) in Engineering.
2. Our students take challenging first- and second-year math, science and engineering courses, allowing them to earn an A.S. degree and transfer as juniors to a four-year engineering program.
3. Inver Hills is a teaching college. That means our focus is on teaching, not research.
4. You will save thousands of dollars by completing your freshman and sophomore years at Inver Hills.
5. Inver Hills is committed to equity and inclusivity; our campus has a strong tradition of welcoming and encouraging students from all cultural and economic backgrounds.

Elizabeth hopes to improve the world through green technologies or medical technologies.

WHY INVER?

Traditionally, engineering as a field has six major branches with numerous subdisciplines as well as at least 40 degree offerings. Working directly with Inver Hills engineering faculty (not university teaching assistants, or TAs) in labs and classrooms with fewer students offers you the opportunity to explore what you really want to do with your engineering degree.

AWARD

Engineering Fundamentals A.S. Degree

The A.S. in Engineering Fundamentals prepares students for transfer to a four-year college or university to complete a bachelor's degree in engineering, including aerospace, civil, electrical, mechanical, or other engineering disciplines.

The program covers courses typically offered in first and second years of an accredited engineering curriculum in the United States. This program also prepares students seeking employment with a strong foundation in engineering principles and practices.

TRANSFER INFORMATION

An A.S. in Engineering Fundamentals transfers easily to these and other institutions:

University of Minnesota

University of Minnesota Duluth (UMD)

Minnesota State University, Mankato:

Mankato and Twin Cities Engineering programs

St. Cloud State University

University of St. Thomas

Please work with an Inver Hills academic advisor or counselor to tailor your degree to meet the requirements of your chosen four-year college or university. Visit inverhills.edu for a complete list of destination bachelor's degrees, or talk to an advisor or faculty member.
