

Manage Exemptions

This document explains how to use the Manage Exemptions feature to exempt a student(s) from having to complete activities within a course site. Exemptions are a way that you can excuse students from activities and have it be visually noticeable to a student.

NOTE: Exemptions do not affect release conditions. For example, if you have a Content module that has a release condition for students to complete a Quiz before the module opens, exempting a student from that Quiz DOES NOT automatically make that Content module visible. The student would still be required to complete the Quiz for the Content module to be visible.

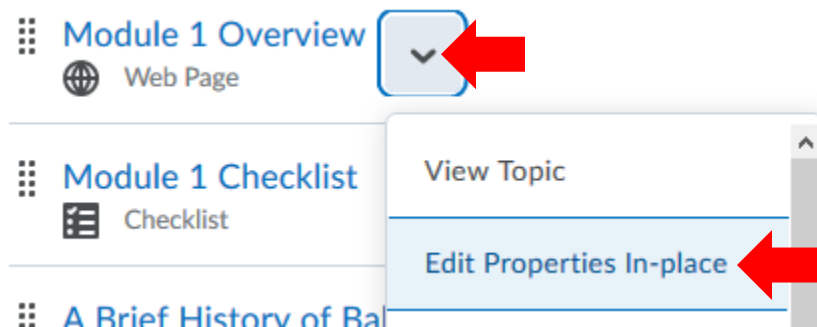

You can exempt students from items within the following:

- Assignments
- Checklists
- Discussion Topics
- External Learning Tools
- Quizzes
- Self-Assessments
- Surveys
- Grade Items

Learning activities such as Assignments, Discussion Topics, and Quizzes that have a Grade Item associated with them will automatically exempt the student from the associated Grade Item when they are exempted from the activity.
