

IHCC Policy 1A.1.1 Policy Development

Part 1. Policy Statement

College policies are statements of institutional positions on issues. They both reflect and support the college's mission and values. While developed to guide institutional decisions or actions, they also may articulate the institution's compliance with external mandates, encourage efficient use of resources or promote consistency by those acting for the institution. College policies impact the entire institution and their applicability is not limited to a single institutional department or division.
